

Kaleb Humpal

I am a (mostly) self taught software developer, always eager to grow my knowledge of anything related to computers. I am passionate about meeting and exceeding goals of the job with minimum supervision. Ready to face whatever challenges may come, as adversity encourages growth.

EXPERIENCE

MENA Union, Publishing Department — Beirut, Lebanon — Adobe InDesign Editor

June 2020 - September 2020

I was responsible for the careful following and implementation of layout designs in Adobe InDesign. Worked with Farsee, Arabic, Turkish, and English study guides, coloring books, bible lessons, etc.

Boba Tea House — Loma Linda, CA — Kitchen Manager

June 2017 - August 2019

I was responsible for ordering supplies, food, and ingredients. Preparation of food, supervising/training new staff in specific stations, and cross-training if necessary, maintaining inventory levels and conducting full weekly inventory assessments, Assisting with menu changes and adjustments, scheduling, and responding personally to guest questions and complaints.

Dan Dunham Remodeling — Colorado Springs, CO — Remodeling, Construction Laborer

Summers of 2013 and 2014

Painted, drywalled, and insulated houses. Built a shed and assisted in the remodel of a re-entry facilitation bathroom.

SKILLS

- Adaptability
- Decision Making
- Git
- Godot Game Engin
- Leadership
- Linux
- Multitasking
- Organizational
- Problem Solving
- Product Knowledge
- Reliability
- Service Minded
- Strong Work Ethic
- Team Player

Certifications

Introduction to Cybersecurity
Cisco Networking Academy

NDG Linux Essentials, Cisco
Networking Academy

PCAP - Programming
Essentials in Python Cisco
Networking Academy

PROGRAMMING LANGUAGES

- Python
- C++
- HTML
- CSS
- JavaScript
- React Native
- PHP
- SQL
- Lua

PROJECTS

Free Rice Bot— Quiz Bot Made with Python

<https://github.com/kaleblub/python-freerice-bot>

<https://freerice.com/game> is a website that donates 10 grains of rice for answering different trivia questions correctly. I decided to automate some of the categories in python. In this project, I learned web scraping, selenium, automated file management, exception handling, and bug hunting.

Stock Prediction Strategies— Python

<https://github.com/kaleblub/stock-prediction-strategies>

I experimented with various stock prediction strategies in python. Ranging from bollinger bands, using three moving averages, attempting using SSL Channels, implementing the ichimoku strategy. I never made it trade actively, but one day I will when I have the funds to experiment with.
